§ Product functions

Digital and mobile data network technologies are employed to integrate the following functions:

- Receive real-time odds data of horse racing, football matches, stock quotation, news and other financial information around the clock
- Two-way mobile messaging, internet browsing and mobile transaction
- FM stereo radio with digital tuning
- Lots of functions with huge memory capacity

Reception of real-time data is achieved with a wireless broadcast network together with an embedded receiver and processing logic in the device. Other messaging, searching and transaction functions are achieved with our *Mango* two-way mobile data network and a radio modem embedded in the device. Since the device is equipped with two-way radio, you can *send* messages as well. With these multiple embedded radios, you can receive real time data and perform mobile transactions anywhere, anytime.

§ Accessories

The content of the gift box includes:

- Device with stylus 1
- Case 1
- Spare stylus..... 1
- Stand 1
- Battery charger 1
- Stereo earphone 1
- User manual..... 1

§ Safety information

Please pay attention to the following :

- Don't place the device and accessories in locations with extreme conditions like high temperatures, humidity, shock, etc.
- Don't use pointed objects to touch the screen other than the stylus provided
- Even with the stylus provided, touch and draw on the screen lightly
- Use only the battery charger provided for charging
- Don't disassemble the device or tamper with it in any other way
- Switch off the device in places like hospitals and airplane cabinets where radio interference can cause troubles

§ Maintenance

Take your device to our appointed service centres if the device needs repairing. To save your time, please check the following to make sure that the device really needs servicing:

- If the device cannot be switched on, is it caused by low battery conditions? (Chapter 2 on “Charging and saving battery power”)
- When battery charging fails, check if the power connectors are properly connected and if the charger terminal is mistakenly plugged into the earphone terminal
- If the device power is left empty for a long time, you must recharge it before switching on (Chapter 2 on “Charging and saving battery power”)
- When the device hangs up, try to reset it (Chapter 2 on “System reset”)
- When data reception is poor, check if the device is located in a place with poor radio coverage (Chapter 5 on “Messages and system functions”)

§ First time use

Upon completion of subscription details, you should have confirmed your preference in service types and functions. The operator should have configured your device over the air to initialize it to normal working order. However, the device may not have sufficient battery power upon initialization. You should therefore charge it first. You should also read this manual carefully in order to be able to use all sophisticated functions provided by the device.

Since real-time data like stock quotations and betting odds are transmitted with a certain broadcast schedule, you may need to wait for a few hours until they are received in full. In particular, you may need to receive all stock names in order that specific stocks can be searched. You may also use the download functions to obtain data. You will know how to do this as you read on. If don't know how this is done for the moment, please be patient and wait only for a few hours. The device will stay normal afterwards.

§ Charging and saving battery power

When the device gives low battery warning, charge it as soon as you can. The device will automatically switch off itself when the battery is too low. Although the data will be kept for a few days upon power depletion, in order to avoid possible data loss, you are advised to recharge at your earliest convenience. You don't need to turn off the device when you charge it; but if the power is too low and the device has shut itself, you should recharge before switching on again. To switch on the device, press and hold the round power key for two seconds.

Please follow this procedure for charging:

1. Connect the charger power plug to an AC outlet;
2. Connect the other end of the charger with a yellow mark to the device's charging terminal;
3. You should hear and see a charging signal given by the device – check the connection if you don't;
4. When the charging is complete, unplug the cord from the device charging terminal.

As in other rechargeable batteries, charging for too many times can reduce battery life. However, you don't need to use up battery power before recharging. One good practice is to recharge regularly, e.g. every other day regardless of battery level.

If you need to stop using the device for a long while (e.g. more than a week), you should recharge and switch off in order to avoid data loss due to low battery. (Chapter 5 on "System functions"). When the device is turned off with sufficient power, the data can be kept for a long time. A word of caution: if the device is fully charged and kept in off condition for a long time, do not store it in a place with high temperature, e.g. in a car.

The charging time depends on how much power is left, but it should be fulfilled within two hours.

The device provides a number of power saving modes to meet your need. Some of these power saving modes automatically turn on and off the two-way radio in 20-minute periods to achieve battery saving. The consequence for using these saving modes is that you will receive 'push type' messages with a maximum delay of 20 minutes. However, not too many messages are of the 'push type', the only one which may affect you is the email service.

There is no consequence for real time data reception and transaction services such as betting and stock transaction. (Chapter 5 on “Messages and system functions”).

When you try to send a message (e.g. for betting or web search), the device will switch on its radio automatically and keep it on for 5 minutes before returning to battery save mode. Therefore, you should not worry about these kinds of applications when you set battery saving modes.

Your situation	Suggested mode	Battery life
Can't afford message delay at all	Always ON	2 — 3 days
Can't afford message delay during office hours	9AM-6PM ON	3 — 4 days
Can afford message delay	Power save	4 — 5 days

The default setting is ‘Power save’.

§ LCD display and backlight

An analog type touch sensitive screen is used in the device which allows you to make on-screen selections and even write with the stylus. On the bottom of the screen seven on screen buttons are provided for easy access to frequently used functions.

If the screen is left untouched for a while, the device will turn off the display for power saving purpose. You can turn on by touching everywhere on the screen or pushing the round power button. The screen-save delay can be set under “System functions” (Chapter 5).

When you are in a dark environment, you can press and hold the power button for two seconds to turn on the backlight. Simply press the power button again to turn the backlight off.

§ Keys and I/O terminals

The device has five keys, seven on-screen buttons and three I/O terminals as stated below.

Keys/terminals	Functions
 Power key	Power on, turn on/ff display, turn on/off backlight (hold key for 2 seconds)
 Monitor key	Open/close monitor list
 Search key	Open/close stock search keyboard
 Up key	Scroll up display content
 Down key	Scroll down display content

	Betting button	For horse, football and mark six betting functions
	Browsing button	For information browsing
	Messages and system functions button	For reading and sending messages; FM radio; calculator; scheduler; dictionary; electronic games and system functions
	Search button	Open/close stock search keyboard
	Escape button	Return to previous menu or exit application
	Up button	Scroll up display content
	Down button	Scroll down display content
Reset terminal		For system reset (do not try unless it is necessary)
Earphone terminal		Connect to earphone
Charging terminal		Connect to battery charger (with yellow mark)

It is easy to mis-plug charger to earphone terminal. Although this will not cause hazards, the battery will not be charged.

§ Keyboard and input

Some applications require you to input text information. The device offers a number of types of keyboards for this purpose. Use of these keyboards is explained below.

- English keyboard
- Chinese input with handwriting recognition
- Symbol/punctuations keyboard
- Special purpose keyboards (for stock search, password entry etc.)

Keyboard type	Description
 <p>English keyboard</p>	<ul style="list-style-type: none">  Cancel input (or press  to exit)  Confirm input and exit keyboard  Switch to Chinese input  Switch to English keyboard  Capital lock  Move cursor to left  Move cursor to right

	<ul style="list-style-type: none">  Move cursor up  Move cursor down  Toggle capital/small letter temporarily  Open symbol/punctuation keyboard  Back space  New line
--	---

 <p>Message X ✓</p> <p>Dear Joe,</p> <p>I refer to</p> <p>Symbol/punctuation keyboard</p>	<p>The input will return to the previous keyboard when any one of the symbols is pressed. Can press  or  to exit.</p>
--	---

 <p>Message X ✓</p> <p>Chinese input</p>  <p>Message X ✓</p> <p>認字設定 X ✓</p> <p>認字速度 普通</p> <p>認字範圍 中文</p> <p>Setting Chinese handwriting recognition parameters</p>	<p>The blank area in the lower middle part of the Chinese keyboard is for handwriting recognition. You may press  to set recognition speed and mode (i.e. to recognize Chinese only, English only or both).</p>
---	---

 <p>Message X ✓</p> <p>親</p> <p>Handwriting input scenario</p>	<p>The diagram on the left shows one recognition scenario. When a character is recognized, the characters with closest match are enlisted with the first (i.e. best) one chosen as default. You can choose any other from the character list to replace the chosen one.</p> <p>The recognition system accepts both traditional and simplified Chinese.</p>
---	---

§ Message alerts

When a message is received, a text window will pop up to display the message with an audio or vibration alert given in accordance with your setting (Chapter 5 on “System functions”). You can stop the alert by pressing anywhere on the screen or any key. Press  or  to exit the message window. You can check the message anytime afterwards in the message centre (Chapter 5). However, since the storage allocated for the received messages is limited, the oldest ones received may be deleted automatically by the device to make room for new ones.

Message alert example	Alert type
 <p>Message window</p>	<ul style="list-style-type: none"> ● Email, SMS messages ● Stock price alert ● Horse racing result alert ● Football goals alert ● News alert ● Scheduler/appointment alerts ● System alerts such as low battery, alarm, etc.

§ Usage statistics

Some information and transaction services are charged in different ways. In general, the package you subscribe to includes certain amount of usage beyond which additional charge may be incurred. However, you should refer to your sales agreement for actual details. You can check your current usage inside “Statistics” of the “System functions” (Chapter 5). The table below only shows typical charging schemes for reference.

Information type	Usual way of charging
<ul style="list-style-type: none"> ● Stock quotation 	According to the Stock Exchange options you have chosen upon subscription
<ul style="list-style-type: none"> ● Message requests which require two-way radio such as sending or downloading emails and downloading information. 	Charged according to number of requests exceeding those included in the subscription plan.
<ul style="list-style-type: none"> ● Broadcast information such as news, email alerts, etc. ● Horse racing, football, mark six information ● Stock trading and betting 	Free of charge

§ Hints for best radio performance

In general, the radio performs best in areas with sufficient radio coverage and when the device is held upright. If you want to send a message in a place with weak radio signal, it helps if you hold the device upright before you press the 'SEND' button. It is also a good practice to leave the device in its stand when it is not being used.

You can check the radio signal from the system function menu (Chapter 5).

§ System reset

When you encounter device malfunction or hang-up, you can try to restart the system by resetting the device. Before you do reset, make sure the device "hang-up" is not caused by low battery (in which case you should recharge instead of reset). To reset, use a small pin and push it through the reset terminal. You will see initialization messages on the screen which you can simply ignore. When system initialization is over, you will hear brief "beep" alerts and find all messages/data previously received cleared. The first thing you should do is to reload the information menu, then wait for the content which is obtained periodically according to the broadcast schedule. Because of the huge volume of data, you may have to wait for hours to recover all.

Information menu after reset	Description
	After system reset all data and menus are cleared. You should reload the menus first by pressing one of the Chinese or English versions as shown in the diagram. Then be patient and wait for the content to gradually recover.

Do not reset the system unless it is necessary.

§ List of betting functions

§ User reminder

Telecom Digital Data Limited does not guarantee messages will arrive at the Hong Kong Jockey Club. Neither Telecom Digital Data Limited nor the Hong Kong Jockey Club shall be responsible for any failure or disruption of this service or any loss or damage resulting therefrom. All transmitted transactions are subject to the Betting Rules of the Hong Kong Jockey Club and/or the Football Betting Rules of HKJC Football Betting Limited and/or the Lotteries Rules of HKJC Lotteries Limited and/or Customer Input Terminal Conditions of use. Copies of the Rules are available on request at HKJC headquarters and any Off-Course Betting Branch.

The issue and usage of MangoCombo is subject to the terms and conditions of the Customer Service Agreement between Telecom Digital Data Limited and the user.

A tamper detection system is installed in the MangoCombo which will cause permanent damage to the device if it is disassembled or tampered with by other means.

§ MangoCombo PIN

The six-digit exclusive PIN (Personal Identification Number) will be generated by the Hong Kong Jockey Club (HKJC) for every successful application. The PIN is used to verify the identity of the user when accessing the HKJC betting service or Telebet account management via MangoCombo. The MangoCombo PIN is different from your Telebet Security Code (which is used to access your Telebet account via an operator or Multi-Purpose Terminal in the Off-Course Betting Branch). You must take your MangoCombo to an Interactive Services Centre of the HKJC for new PIN generation if you lose your MangoCombo PIN.

§ Usage Boundary

- Service is available in the territory of the Hong Kong SAR
- Service is permitted on the race courses and Club facilities of the HKJC
- Service is restricted to the registered MangoCombo account holder who is also a Telebet account holder

§ Important notes on sending bets

After sending the stored bets, the user must wait for the reply from the HKJC to confirm the bets were accepted before continuing. If no reply message has been received from the HKJC after sending the transaction request, the transaction will be regarded as an unsuccessful transaction. To check the status of previous bets, please use the “Recall Transaction” function or call HKJC Interactive Services Hotline 1880.

§ Loss of MangoCombo

Please call Telecom Digital immediately (7777 1881) if you lose your MangoCombo. User also needs to call the HKJC Interactive Services Hotline 1880 to report the loss and terminate the MangoCombo betting service immediately.

§ Customer services

Please call HKJC Interactive Service Hotline 1880 for all Telebet Account issues. For the operation of MangoCombo, please call Telecom Digital customer service hotline (7777 1881) or visit www.mangocombo.cc. Please provide the CIT number and MAN number during your enquiry.

§ Error Messages

Horse racing related messages	
Message	Details
Missing Race Number	Race number is not yet selected
Race Sequence Error	Race number selection in error, e.g. choosing race 15 for D-T first leg
Insufficient selections	Insufficient number of horses selected
Too many bankers	Should choose suitable number of bankers
Invalid Meeting	The selected meeting not yet ready for betting, please try again later.
Pool Closed	Selected pool has been closed for betting
Horse XX Scratched	Selected horse scratched, please re-enter the available horse number

Mark six related messages	
Message	Details
Invalid Total Number	The number of selections for the Mark 6 exceeds the valid limit (available selection: 6 to 33 numbers), please re-enter the valid numbers of selection.
Insufficient Selections	The number of selection for Mark 6 is not enough. Re-enter the valid numbers of selection.
Too Many Bankers	Too many bankers, re-enter the valid numbers of bankers
Pool Not Available	The selected pool is not available, please try later

Football related messages	
Message	Details
Missing Match Number	Match number not yet selected
Insufficient selections	Number of selection insufficient
Too many selections	Too many selections
Amount exceeds limit	Excess the maximum limit allowed by HKJC, reenter the amount
Over Daily Max inv for FB 9	The daily maximum betting limit is exceeded, the Club will not accept any more bets within the same day
Pool Not Available	The selected pool is not available, please try later

Accounts functions related messages	
Message	Details
Invalid Input	Bank PIN not correct, please re-enter the PIN (at least 4 digits)
Minimum amount is \$XXX	Entered amount should not be less than the minimum limit \$XXX
Maximum amount is \$XXX	Entered amount should not be greater than the maximum limit \$XXX
Insufficient Balance	Insufficient funds for betting, withdrawal or deposit; deposit funds into the account. Transfer sufficient amount to your account.
No Details	No transaction records for Telebet A/C when account is being checked by the “Recall Transaction” function
All Pools Refund	The invested race(s) abandoned and all investment for that race(s) refunded
Refer to Bank	Fund transfer request rejected by the bank, please contact your bank
Too Many Withdrawals	The number of withdrawals exceeds daily maximum number of on-line withdrawals limit. Perform withdrawal again on the following working day.
Bank PIN Error	Bank PIN not correct, re-enter or contact your bank
Bank System Fault	Bank system fault, please try again later

The main menu for information browsing can be reached by pressing the on-screen button . Broadcast information will be the focus of the coming sections; information fetched using the two-way network will be discussed later, especially in the section “Web resources”.

Main menus	Description
<p>Financial information main menu</p>	<p>The information main menu is divided into <i>Financial information main menu</i> and <i>Sports information main menu</i> which are obtained by respectively pressing the main menu tabs FINANCE and SPORTS. Each main menu is composed of a number of sub-menus which may be further divided into sub-menus (note that there may be, although unusual, more menus than the display can show; try to press to look for the extras). This is a way of organizing information which allows you to locate the data you want in the most friendly fashion: to read local news, for example, press “News” from the main menu and then “Local news” from the sub-menu. Press to exit to the previous menu or the main menu tabs to directly return to the respective main menus.</p> <p>¹The content, menus, sub-menus are maintained by the editing staff who may make modification from time to time for continued improvement. The screenshots shown here are just examples for illustration purpose.</p> <p>²Only limited support to English content is available.</p>
<p>Sports information main menu</p>	

§ Stock quotations

There are two ways for reading stock quotations:

- Press **港股** inside the *Financial information main menu*;
- Press hot-key or on-screen button and then enter the stock code.

Stock quotations	Description
<p>Stock quotation main page</p>	<p>The stock quotation main screen shows quotations, real-time price chart and indices. The small chart can be pressed to expand to a large chart (press to exit). Press the price difference ↓-0.250 for percentage display and press once more for display of previous closing. Press the HSI field for automatic calculation of HSI future change relative to HSI. Press for the second page of information.</p>

Downloading stock quotations

Via the two-way network

Downloading stock quotations:

If the device is in a location where broadcast signal is weak or even null, you may try to use the download function to get the stock data via the two-way network. Press the stock name to pull down the stock function menu and then press "Download stock".

Downloading stock quotations may incur extra charge. Please refer to your sales agreement for details.

Display in large font	Description
	<p>Press the stock name to pull down the stock function menu and then press “Large font” for display in large font. To change back to small font, pull down the function menu again then choose “Small font”.</p>
HSI and its future	Description
	<p>Press hot key  or on-screen button  and then press “HSI”. Press  to read HSCEI and its future.</p> <p>The small real-time charts can be enlarged.</p>

§ Stock trading

This function is provided by individual stock brokers. Activation of the function must be done by prior subscription and arrangement with the broker. For details, refer to the manual for stock trading which the broker will supply when you subscribe.

§ Other information

Besides quotations for stocks and indices, there are many other kinds of information. The ones you are entitled to read are defined by your subscription plan. Please refer to the sales agreement for details. This section only illustrates general operation by using example screenshots.

Financial information	Description
	<p>Procedure for reading financial information:</p> <p>Follow the sub-menus until the content is reached. Very often, the content contains a number of pages; press  to scroll down. Press  to exit. In the example “News” is selected which expands into another level of sub-menus where “Local news” is selected.</p> <p>¹ Some content contains data which requires you to scroll left and right in addition to up/down. In this situation a pair of left/right scroll buttons  will appear on the title bar.</p> <p>² Some content may contain links to remote servers which, upon selection, will trigger off two-way network communication which may incur charge normally to be deducted from your basic plan.</p>

§ Reloading information

There are places where broadcast signal is weak. In these places data errors are possible. If  Error:reload is seen at the end of the content, the device has detected errors in the content and you may press the associated link for reloading via the two-way network.

Reloading information	Description
<p>   </p>	<p>Press “reload” to reload the content</p> <p>¹ Content reload requires two-way network communication which may incur charge normally to be deducted from your basic plan.</p> <p>² If you miss the whole content, the “reload” link cannot be generated as well. In such situations you should check the download facilities inside “Web search” (see later sections) to see if you can reload the data in need.</p>

Sports information – horse racing	Description
 <p>Sports information main menu</p>  <p>Horse racing information main menu</p>  <p>Race list</p>	<p>Browsing horse racing information:</p> <p>Choose “Horse racing information” from the Sports information main menu and then choose “Individual races” for such data as race details, odds, race results, etc.</p> <ul style="list-style-type: none"> ● Runner list ● Race result ● WP odds ● WP odds for yesterday ● Q/QP odds ● TRI odds ● DBL ● Total investment ● Previous match details ● Starter statistics ● Odds trend ● Intermediate race result ● Tips <p>...etc.</p> <p>Horse racing information may require separate subscription, please refer to your sales agreement.</p>
Horse racing odds	Description
 <p>Race details</p>  <p>Choosing odds data to display</p>	<p>Every race includes different kinds of data. Press <u>排位</u> to pull down the function menu and choose the data you want to read. For some content, left/right scrolling is required; the system will provide a pair of keys <u>← →</u> on the title bar for such purpose. Press <u>一場</u> for the general information about the race.</p> <p>The underlined items in the content are links which you can press for access to related data. For example, pressing a horse name such as <u>中國天下</u> can access the detailed information for the horse.</p>

<p>一場 Q/QP率 05:05P</p> <p>▶ 1 一號搭 ▶ 8 12 / 4.9 ▶ 2 19 / 6.7 ▶ 9 55 / 21 ▶ 3 39 / 12 ▶ 10 58 / 19 ▶ 4 85 / 37 ▶ 11 56 / 15 ▶ 5 3.8 / 1.4 ▶ 12 173 / 58 ▶ 6 14 / 5.7 ▶ 13 19 / 8.6 ▶ 7 5.9 / 2.3 ▶ 14 119 / 50</p> <p>Q/QP odds</p>	<p>The Q/QP screen also contains many links you can press: e.g. pressing ▶ 3 will bring you to the odds for combinations with runner number 3.</p>
<p>Other horse racing information</p>	<p>Description</p>

§ Monitor

“Monitor” is a facility which allows you to mark content often referred to for easy access. Except sports information, most content in the financial information menu can be added to the monitor. You can also set alerts for some of the content in the monitor (see next section).

Monitor	Description
  	<p><u>Open the monitor list</u></p> <p>Press  and then choose individual items you have marked. Press  to exit after finish reading.</p> <p><u>Add to monitor</u></p> <p>Enter the content for the information item you want to mark, press on the title to pull down function menu, then choose “Monitor-Add” to add to the monitor. The monitor can hold up to 20 items. Note that you can mark the same item more than once (e.g. for setting more alerts).</p> <p><u>Remove from monitor</u></p> <p>Enter the information content from the monitor, pull down the function menu, and then choose “Remove”.</p>

§ Information alert setting

Two kinds of alerts are provided: *Financial information alerts* and *Sports information alerts*. *Financial information alerts* is further divided into *Stock price alerts* and *News alerts*.

Financial information alerts	Description
	<p><u>Setting stock price alerts</u></p> <p>Open the monitor, press  to enter alert setting screen (if no setting is effective the button will be displayed in light grey). Press corresponding  button to set high/low/alarm. Press  to confirm.</p> <p><u>Setting news alert</u></p> <p>Open the monitor, press  to enter alert setting screen. Press one of the four text fields to enter a text of no more than 6 characters and  button to set alarm. Press  to confirm. When the device receives the news you marked the match strings entered will be used to search against the message.</p>

 	<p>An alert is given if the message contains a substring which matches.</p>
<p>Sports information alerts</p>	<p>Description</p>
 <p>Alerts setting</p>	<p><u>Setting horse racing alerts</u></p> <p>Enter Horse racing main menu from the Sports information main menu and choose “Alert setting”. Press [🔊] or [🔇] for activating/deactivating the corresponding alert item. If an alert is activated, a message will pop up if the device receives a triggering event from the server.</p> <p><u>Setting football alerts</u></p> <p>Setting alerts is very similar to the case in horse racing, except that the setting for football alerts is automatically cleared every day when a new match list is available, whereas the setting for horse racing is kept unchanged.</p>

§ Web resources

You can access some of the information available on the Internet via the two-way network. The possible incurred charge will be deducted from your basic plan. The kinds of information which can be downloaded this way are numerous; the discussion below will only use examples to illustrate some of the possibilities.

Using web resources	Description
	<p>Web resources can be accessed by choosing “Web resources” in the Financial or Sports information main menu. Two services are offered at the time of writing: “Shortcuts” in which you can access web resources via pre-stored URL’s and “Reloading lost data” in which you can reload lost data by specifying which piece of data you need, e.g. WIN odds for race number 3.</p>
 <p>[上] Backward to web page [下] Forward to next page [首] Home page Edit shortcut or bookmark Delete shortcut or bookmark</p>	<p>When you enter “Web resources” you will find some pre-stored web sites. To store a web site as shortcut, you should first open a new “shortcut folder” (and give it a name). When a new folder is opened, you can enter URL for web pages as shortcuts or simply choose from a set of user supplied URL’s. “Shortcut” here refers to pre-stored web resources such as search boxes which you can access by clicking a link instead of typing their full URL’s. You may also bookmark the web pages you often visit. When a web page is bookmarked (e.g. “IBM” in the diagram), press the link next to the icon to get to the page the next time you want to read it. For better air time use every web page is broken into sub-pages in such a way that every time you request only a sub-page is given. You have to press [MORE] for the next sub-pages. You may also delete or edit every web page you store as shortcut or bookmark. For editing you can change the name and the start sub-page to load (for skipping data you don’t want to read).</p>

Hints for using shortcuts:

- Some web sites respond slowly. When the system shows “Sending...”, please wait patiently. If the requested page still does not arrive, you may press **X** to cancel – the system will also cancel the request automatically upon timeout anyway.
- Some web pages contain a lot of information such as advertising artwork which may not be useful to you and may cause a lot of waiting time. If you happen to be reading these pages, you may use [JUMP] instead of [MORE] when you fetch sub-pages. You may not know how many sub-pages to skip; but once you have reached the sub-page you want, you can add that to your bookmark and make it to start from that sub-page so you can skip useless content in your next visit.
- Every time you press [MORE] or [JUMP], the basic usage included in your package will be decremented by one. The decrement will continue in accordance with your network use until nothing is left in your account. In such event the device will give a reminder yet without stopping you from further use. You may be charged for the extra usage; please consult your service agreement for details.
- Use bookmarks and sub-page jumps wisely can avoid unnecessary usage.
- If you are familiar with the operation of the Internet and would like to make shortcuts yourself, follow these guidelines:

URL in general: ‘~’+ URL (instead of typing ‘http://’)

E.g. URL for YAHOO! Hong Kong: ‘~hk.yahoo.com’

URL which invokes CGI: ‘~’+ URL, using ‘\$’ to replace input fields

E.g. Dictionary search box for YAHOO! Hong Kong: ‘~hk.dictionary.yahoo.com/dict?s=\$’

You need to open a web page in its raw HTML format and look for the URL of the resource you want (e.g. a search box). Using the Yahoo dictionary as example again, when you open the page and delve into the content, you will see that the URL for the CGI handling the dictionary search input box is ‘hk.dictionary.yahoo.com/dict’ and that the CGI accepts one parameter ‘s’, using character ‘?’ as separator, hence the shortcut string above.

Not all URL’s can be converted into shortcuts. In general, web sites constructed using Java, Flash or XML cannot be converted. On the other hand, there is little problem with resources using the HTTP ‘GET’ (as in many search boxes like the Yahoo dictionary above). Nevertheless, the amount of information you can access this way is huge; it is worth spending some time to tailor the shortcuts to meet your need.

Press on-screen button  to enter the Messages and system functions main menu as shown below. There are seven buttons in the menu, respectively for the FM radio, calculator, etc. Press the corresponding button to enter the application you want. Each of these applications is described below.

Display	Description
 <p>Messages and system functions main menu</p>	<p> 08:00AM Daily alarm setting (will show “N/A” if alarm is not set)</p> <p> Two-way signal strength (1 – 4 bars)</p> <p> Broadcast signal strength (1 – 4 bars)</p> <p> Remaining battery power</p>

¹ There are separate signal strength indicators for the two-way and broadcast networks, each on scale 1-4 bars, where “4 bars” means “very strong” and “1 bar” means “low but OK”. When a power save mode is set (see Chapter 2), the two-way signal indicator will show “OFF” when the two-way radio modem is turned off for power saving purpose and the green LED indicator will stop flashing.

² If the two-way signal is very weak (i.e. with one 1 bar or even with “LOW” indication), the LED indicator may turn red. In such situations, you may try to hold the device upright or put it back to its stand for a better position for the radio. This works most significantly when you want to send a message in a location with weak radio coverage.

³ You can also check radio signal strength inside “Network” under the “TOOL” menu. The reading is consistent with what you see from the bar indicators outside, with the exception that the reading inside is in numeric values (0 – 50, the larger, the better).

§ FM Radio

Press “RADIO” in the Messages and system functions main menu to enter the FM radio application. The device has preset all Hong Kong broadcast channels with their respective mnemonic names, you may just press the corresponding memory keys P0-P6 or choose a channel from the drop down function list instead of doing actual tuning. You may also do manual tuning and save the channel found into P7-P9 which is reserved for this purpose. To do this, pull down the function list and choose “Add channel”. The device has also recorded a number of channels in mainland China, you can choose from the list by pulling down the function menu again and then choosing “Other channels”.

Display	Description
 <p>FM radio</p>	 On/off  Decrease volume  Increase volume  Search channel backwards  Search channel forwards P0-P9 Memory keys (with P0-P6 preset)  Pull down function list [Input freq] Input channel frequency [Other channel] Choose from Chinese channels [Add channel] Add new channel to P7 – P9 [Del channel] Delete channel  Exit application with radio remaining on
 <p>Pull down function list</p>	

The radio will turn off automatically after 6 hours of continuous play to prevent undue power consumption when the user forgets to turn off. It will also turn off when the earphone is disconnected.

§ Calculator

Press “CALC” in the Messages and system functions main menu to enter the calculator application. The applications provide both business and scientific calculation modes whose operation is similar to ordinary calculators.

Display	Description
 <p>Business calculation mode</p>	 Store calculation result  Recall calculation result  Accumulate calculation result into storage  Delete stored result  Cancel calculation  Exit calculator application

Scientific calculation mode

§ Scheduler

Press “DATE” in the Messages and system functions main menu to enter the scheduler application. You can set one-time appointments or periodic reminders in the scheduler and use its notes and calendar functions.

Display	Description
 <p>Calendar mode</p>  <p>Appointments</p>	<p><u>Calendar mode</u></p> <p><u>18</u> Current date (October 18)</p> <p><u>19</u> Dates containing appointments are underlined</p> <p>To set an appointment on <u>October 19</u>:</p> <ol style="list-style-type: none"> 1. Press <u>19</u> to enter appointment list; 2. Press  for a new appointment 3. Input appointment details, including alert time and reminder text (Press [Edit] to input reminder text); 4. Press  to save appointment; 5. The system will return to appointment list after saving 6. Press  to exit to calendar mode.

Input appointment details

Appointment list

Edit appointment

Other functions

Search for particular months

Edit appointment:

1. Choose date from the calendar;
2. Press the appointment you want to edit from the appointment list;
3. Press  to enter edit mode;
4. Modify the details;
5. Press  to save.

Delete appointment:

1. Choose date from the calendar;
2. Press the appointment you want to edit from the appointment list;
3. Press  to delete the appointment.

If the memory is full, the system will delete some oldest records to make room for the new one automatically.

Search for particular month:

1. Pull down the function list and choose “Search”;
2. Choose a month to search and then press ;
3. If you want to go back to the current month, pull down the function list again and choose “Today”.

 <p>Periodic reminders</p>	<p>Periodic reminders:</p> <ol style="list-style-type: none"> 1. Choose “Events” from function list; 2. Press  to add a new reminder; 3. Choose one of daily, weekly, or monthly events; 4. Enter details; 5. Press  to save. <p>You must enter a particular date if you choose weekly or monthly events.</p>
	<p>Alert ringtone:</p> <ol style="list-style-type: none"> 1. Choose “Ringtone” from function list; 2. Choose ringtone; 3. Press  to confirm.
	<p>Notes:</p> <ol style="list-style-type: none"> 1. Choose “Notes” from functions menu; 2. Press  to add new notes record; 3. Enter file name and press  to enter notes; 4. Press  to save.
 <p>Lunar calendar</p>	<p>Lunar calendar:</p> <ol style="list-style-type: none"> 1. Choose “Lunar” from functions menu 2. Scroll down to check lunar dates; 3. Press  to exit

§ Dictionary

Press “DICT” in the Messages and system functions main menu to enter the dictionary application. You can enter English to get Chinese meaning or enter Chinese to get English entries which match the Chinese meaning. The dictionary contains about 40K entries.

Display	Description

 主旨: Our proposal
 內容:
 Dear partners in Mango,
 After the Shenzhen meeting.

Please choose
 REPLY
 FORWARD

Replying and forwarding messages

- Replying and forwarding messages:
1. In "IN" mails choose the message to reply or forward;
 2. Press Reply;
 3. Choose "REPLY" or "FORWARD";
 4. If you choose "FORWARD" you need to further choose destination (i.e. to email, SMS, fax, or page);
 5. Edit receiver address and message content;
 6. Press Save to save or Send to send.

Save to..
 ADDR. BOOK
 CALENDAR

Storing messages

- Storing messages:
1. Enter message from "IN" mails;
 2. Press ;
 3. Choose to save into address book or scheduler;
 4. If you choose to save into scheduler then enter a date;
- Only messages with content in the form "NAME" + "PHONE NUMBER" can be saved into the address book.

All msgs
 Draft 11:04P
 Sent 12:29P
 Sender address 18:31A
 Sender name 2:19A
 Sender name 2:08A
 Sender name 2:03A

IN OUT ADDR.

Append to..
 Name:
 E-mail SMS
 FAX Page

Setting sender details

- Sender address setting:
- Pull down function list from "OUT" mails menu and then choose "Sender address" to set your reply email address. The system will use default values before these fields are set.
- Sender name setting:
- Pull down function list from "OUT" mails menu and then choose "Sender name" to append your name to the out-going messages. You can choose to append selectively to emails, SMS, fax, or pages.

 <p>Address book</p>	<p>Address book:</p> <ol style="list-style-type: none"> 1. Inside address book press: <ul style="list-style-type: none"> ● Individual addresses for editing ●  Find to search records by name ●  New to add an address record
 <p>Editing an address</p>	<p>When you edit a new address book record you may use separators as in “(852) 1234-5678” to improve readability (only space, ‘-’, and parenthesis characters may be used) . The system will ignore these separators when these kinds of addresses are used in SMS messages.</p>

Downloading email content by pressing [MORE] will incur extra charge for two-way network use which will be deducted from your basic package.

§ Other applications

Press “MISC” in the Messages and system functions main menu for other applications such as games and ebook reader.

Display	Description
 <p>Reversi</p>	<p>You will play black and go first. Press  or  to exit.</p>
 <p>Dice game</p>	<p>Throw the dices by pressing ; press  to change number of dices;  to exit.</p>

 <p style="text-align: center;">Fire!</p>	<p>Press START to start game. Press ← LEFT and RIGHT → to control; ESC to exit.</p>
 <p style="text-align: center;">Tetris</p>	<p>Press Start Game to start; ←, →, ↻, ↓ to control; ESC to exit.</p>
 <p style="text-align: center;">Connect four</p>	<p>Press ⏮ to choose form playing with computer or another user. Press ↓ to drop ball. You play white and go first. Press ESC to exit.</p>
 <p style="text-align: center;">Ebook reader</p>	<p>The ebook reader is only for users who have purchased the “Combo Desktop” program which runs on a personal computer with a Windows operating system. (The “Combo Desktop” is not for betting users for security reasons.) Refer to the “Combo Desktop” manual for details.</p>
 <p style="text-align: center;">Mines</p>	<p>Press ■ to uncover; 🚩 and then ■ to mark as mine; ⊗ or ESC to exit.</p>

 <p style="text-align: center;">Octopus</p>	<p>Press Start Game to start game; LEFT and RIGHT to control; ESC to exit.</p>
 <p style="text-align: center;">Space invaders</p>	<p>Press Start Game to start game; ←, → to control; FIRE to fire; ESC to exit.</p>
 <p style="text-align: center;">Stop watch</p>	<p>Press ▶ to start stop watch; SET to set timer parameters; to pause; RESET to reset timer; ESC to exit.</p>

§ System functions

Press “TOOL” in the Messages and system functions main menu for system functions.

Display	Description
 <p style="text-align: center;">System functions</p>	<p>There are eight systems; Press ESC to exit when finish using them.</p>
 <p style="text-align: center;">System time</p>	<p>Set system date, time, country, and daylight saving time adjustment. Press ✓ to confirm when finish setting.</p>

 <p>Daily alarm</p>	<p>Set daily alarm and ringtone (must choose a ringtone to enable alarm). Press ✓ to confirm.</p>
 <p>Alert mode</p>	<p>Choose alert ringtone and one of audio, vibration, audio-vibration, and silent modes. Choose “Touch-On” to enable/disable touch panel audio feedback and “Unread-Off” to enable unread message reminder. Press ✓ to confirm.</p>
 <p>Screen setting</p>	<p>Set screen saving delay and display contrast. Press ✓ to confirm.</p>
 <p>Calibration</p>	<p>When you find that the touch panel is not accurate, you can use this function to calibrate it. Tap at the four crosses at the corners and then press ✓ to confirm.</p>
 <p>Statistics</p>	<p>Check current usage: “Avail” means usages available (total minutes for stock quotation view time or total number of times using the two-way network, i.e. “Misc”); “Used” means actual usage up to now; a “Status” of “OK” means usage within allowed limits. If you exceed available usage by a large margin, your device may be stopped in which case you have to contact customer service for re-activation. The lower part records last month’s usage. Press  to exit.</p>

 <p style="text-align: center;">Network</p>	<p>Check such network parameters as MAN id, two-way signal strength, broadcast signal strength, channel id, and device status. You can set roaming area here if you have subscribed to roaming service. Press ✓ to confirm or  to exit.</p> <p style="color: red;">If you set roaming area incorrectly (e.g. choosing “PRC” when you are in “HK” or vice versa), the two-way modem will not function properly.</p>
 <p style="text-align: center;">System resources</p>	<p>Check remaining battery power and storage. Press  to exit.</p>
 <p style="text-align: center;">Language</p>	<p>Change system language. Press  to exit.</p>
 <p style="text-align: center;">Power management</p>	<p>Set power saving mode or switch off power. Press ✓ to confirm or  to exit.</p> <p style="color: red;">¹ Press and hold the round power key for 2 seconds to switch on device when it is off.</p> <p style="color: red;">² When the device is switched off, both broadcast and two-way radios will not work. <u>Do not switch off unless it is necessary.</u></p>
